ABHIJITH E A

Full Stack Developer | Angular | ASP.NET Core | C# | SQL Server

Phone: +91 7510142700 | Email: abhijithea783@gmail.com
GitHub: https://github.com/Abhijithgit

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of professional experience in designing, developing, and maintaining web applications using Angular, ASP.NET Core Web API, ASP.NET MVC, C#, SQL Server, and MySQL. Experienced in developing RESTful APIs, implementing secure authentication using JWT, building responsive user interfaces, and integrating frontend applications with backend services. Proficient in Entity Framework Core, LINQ, Dependency Injection, database optimization, and API documentation using Swagger/OpenAPI. Hands-on experience developing financial technology applications, including blockchain-based asset platforms and loan processing systems. Familiar with Azure, Git-based CI/CD workflows, Agile methodologies, and software development best practices.

TECHNICAL SKILLS

- **Programming Languages:** C#, TypeScript, JavaScript, SQL
- **Frontend:** Angular (2+), React.js, HTML5, CSS3, SCSS, Bootstrap, Angular Components, Services, Data Binding
- **Backend:** ASP.NET Core, ASP.NET Core Web API, ASP.NET MVC, RESTful APIs, Entity Framework Core, LINQ
- **Databases:** Microsoft SQL Server, MySQL, MongoDB
- **Security & API Development:** JWT Authentication, REST API Integration, Swagger/OpenAPI, Dependency Injection
- **Cloud & DevOps:** Microsoft Azure, Git, GitHub, GitLab, CI/CD
- **Development Tools:** Visual Studio Code
- **Core Concepts:** OOP, SDLC, Debugging, Database Optimization, Agile Development

PROFESSIONAL EXPERIENCE

Software Engineer

Geesesquads Software Services Pvt Ltd | Kochi, India

August 2025 - Present

- Developed and maintained backend services using ASP.NET Core and C# for financial technology applications.
- Designed and integrated RESTful APIs to support communication between application modules and external systems.
- Implemented backend business logic supporting financial transaction processing and application workflows.
- Developed dashboards to monitor transaction activities and application operations.
- Worked on backend optimization, debugging, and application reliability improvements.
- Collaborated with cross-functional development teams to implement new features and maintain existing functionality.

Software Developer

Manappuram Finance Limited | Kerala, India

August 2023 - July 2025

- Developed and maintained loan processing applications supporting financial operations and loan approval workflows.
- Built responsive user interfaces and integrated frontend components with backend services.
- Developed backend business logic using C# and LINQ to support loan processing operations.
- Implemented RESTful APIs for communication between frontend applications and backend systems.
- Worked with SQL databases, including query development, database operations, and performance optimization.
- Performed debugging, testing, and application maintenance to improve system reliability.
- Collaborated with team members to implement business requirements and resolve application issues.

PROJECT EXPERIENCE

Assetera - Blockchain-Based Financial Platform

Technologies: ASP.NET Core, C#, REST APIs, SQL, Blockchain Integration

- Contributed to the development of a financial technology platform supporting blockchain-based tokenized securities.
- Developed and integrated backend RESTful APIs to support financial transactions and external service communication.
- Implemented business logic for transaction processing and blockchain-related operations.
- Developed transaction-monitoring dashboards to track asset activities and user operations.
- Worked on application debugging, backend optimization, and reliability improvements.

Loan Processing System - Manappuram Finance Limited

Technologies: Angular, C#, LINQ, SQL, REST APIs

- Developed application features supporting loan processing, management, and approval workflows.
- Built responsive frontend interfaces using Angular to support loan-related business operations.
- Implemented backend business logic using C# and LINQ.
- Developed and integrated RESTful APIs for frontend-backend communication.
- Worked on SQL query optimization, debugging, and application maintenance.

E-Cart Application

Technologies: AngularJS

- Developed an e-commerce application supporting product management, CRUD operations, and user authentication.
- Implemented dynamic user interfaces using two-way data binding.
- Designed responsive application pages for improved usability.

Netflix Clone

Technologies: React.js, Redux, React Router

- Developed a responsive video-streaming-style frontend application using React.js.
- Implemented Redux state management and client-side navigation using React Router.
- Created reusable UI components and responsive layouts.

EDUCATION

Bachelor of Engineering (B.E.) - Computer Science and Engineering

Vinayaka Mission's Kirupananda Variyar Engineering College, Salem

2018 - 2022

CERTIFICATIONS

- MEARN Stack Development (Angular & React)
- Infosys Certified API Developer - Springboard
- Cyber Security & Ethical Hacking
- Data Science Foundation Certification
